Other wood finishes available (additional charge)
30 mm thickness

Option Electrical socket integrated in side panel

Note! Radiator sensor head, installation screws,
rawplugs and fittings are not part of our scope
of delivery

As wood is a natural material, there will be some natural variation in colour, grain structure and pattern between bench tops and between the various wood types. Light wood types such as beech will darken in time, becoming more uniform in colour. On the other hand, dark wood types such as mahogany may become slightly lighter.
