# A overall image that will win you over

The different frames into which the grilles are accurately fitted are a perfect match to the grille. The grille and frame combination gives such a uniform overall image.

# An inward-looking choice

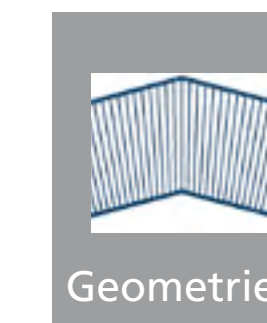

You have the choice: grilles with a wide range of different profiles meet any requirement for resilience, functionality and design.

# Cost-saving durability

The particular advantage of our grilles that can be used on both sides: just turn them over - and everything looks like new.

# Optiline roll-up grilles

► Free area: approx. 65 %

Aluminium - Natural anodised E6/EV1

The Optiline grille stands out on account of its narrow bar profiles and also its narrow spacing between the bars, creating an attractive image with correct bar spacing in terms of heat output.
